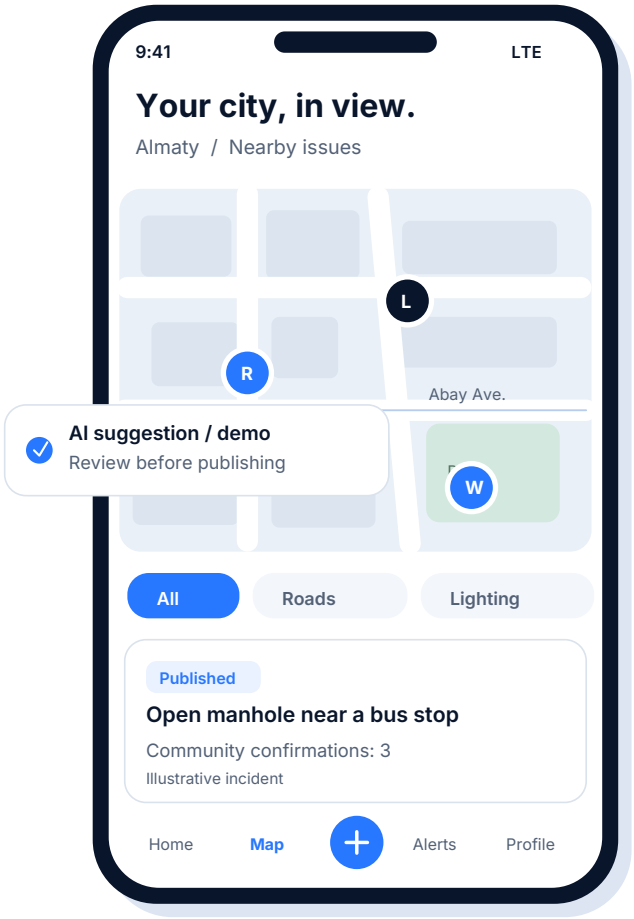
QalaPulse

CIVICTECH / GOVTECH / AI

CITIES BEGIN WITH PARTICIPATION

Every City Has Problems. Every Voice Should Matter.

QalaPulse - Turning everyday city issues into visible, actionable insights.



Concept UI / schematic map / sample data

THE PROBLEM

A broken road. A dark street. A report lost across channels. Residents need visibility; organizations need structured information.

BUILT FOR KAZAKHSTAN

Russian + Kazakh / Citizen-first

OUR SOLUTION

SNAP → **DETECT** → **MAP** → **TRACK**

- **SNAP**: Photo + location
- **DETECT**: AI aid + human review
- **MAP**: Visible local reports
- **TRACK**: Statuses + confirmations

WHY QALAPULSE? / INTENDED VALUE

For citizens

Easier reporting.
Visibility after submission.

For cities

Structured information about urban issues.

For communities

A shared picture of local problems.

PRODUCT PROGRESS

Flutter MVP
RU/KK, auth, drafts, duplicates

PostGIS + Docker
Backend and geospatial stack

38 Flutter tests*
Reported technical checks

*Repository QA report; not pilot outcomes. AI is mock-first; cloud quality is unvalidated.
No government integration. Privacy redaction and device acceptance need pilot validation.

BUSINESS OPPORTUNITY

Free for residents. Proposed organization subscriptions for monitoring and analytics, plus implementation fees.

Scale hypothesis: validate one local pilot, then repeat with new organizations.

Pricing and buyer demand remain unvalidated.

Let's Build Cities That Listen.

Seeking pilot partners, strategic collaborators and early-stage investors.
